ALEXANDRE BULTÉ

Développeur Freelance Python / AngularJS / Cordova

@abulte alexandre.bulte.net

AmiAmi

www.amiami-app.com

CONCEPT

- · Hey les amis (et vos amis)!
 - « un bon dentiste vers Villiers? »
 - « un resto végétarien à Paris 3? »
 - « quels films voir cette semaine? »
 - « un plombier sérieux à me recommander ? »

QUELQUES CHIFFRES

- MVP 6 mois
- 2700+ utilisateurs
- 900+ annonces
- 3300+ réponses

EQUIPE

- 2 fondateurs (CEO+CTO)
- I dév backend + Angular + Cordova
- I dév iOS
- · l intégrateur part-time

ARCHITECTURE

Frontend

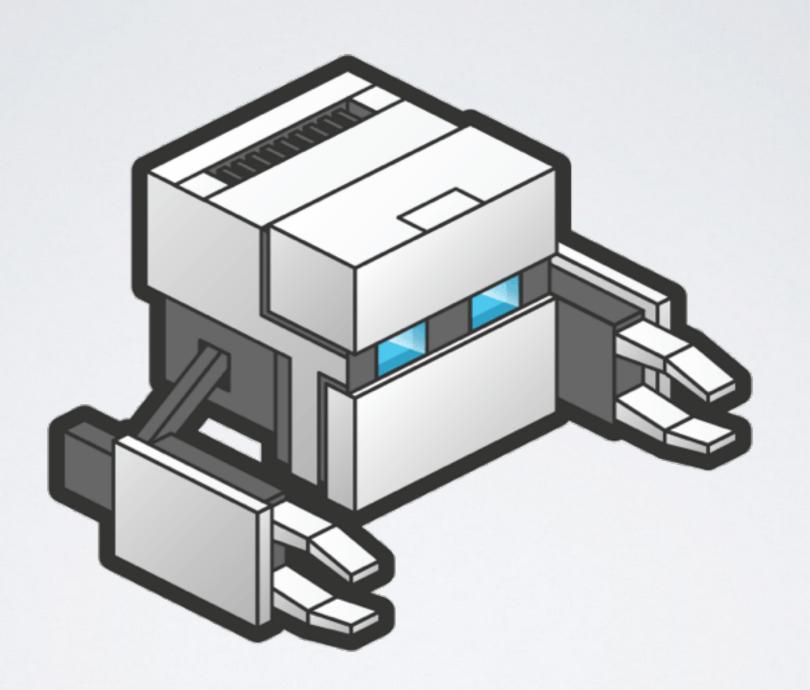

Backend Heroku Web / web mobile AngularJS / BS3

Android app Cordova iOS app native

API Django REST Framework

BDD PostgreSQL Cache + queue Redis

Worker RQ

POURQUOI

- REX Phonegap
- Sortir vite
- Overhead minimal vs version Web
- Ressources limités (1,x)

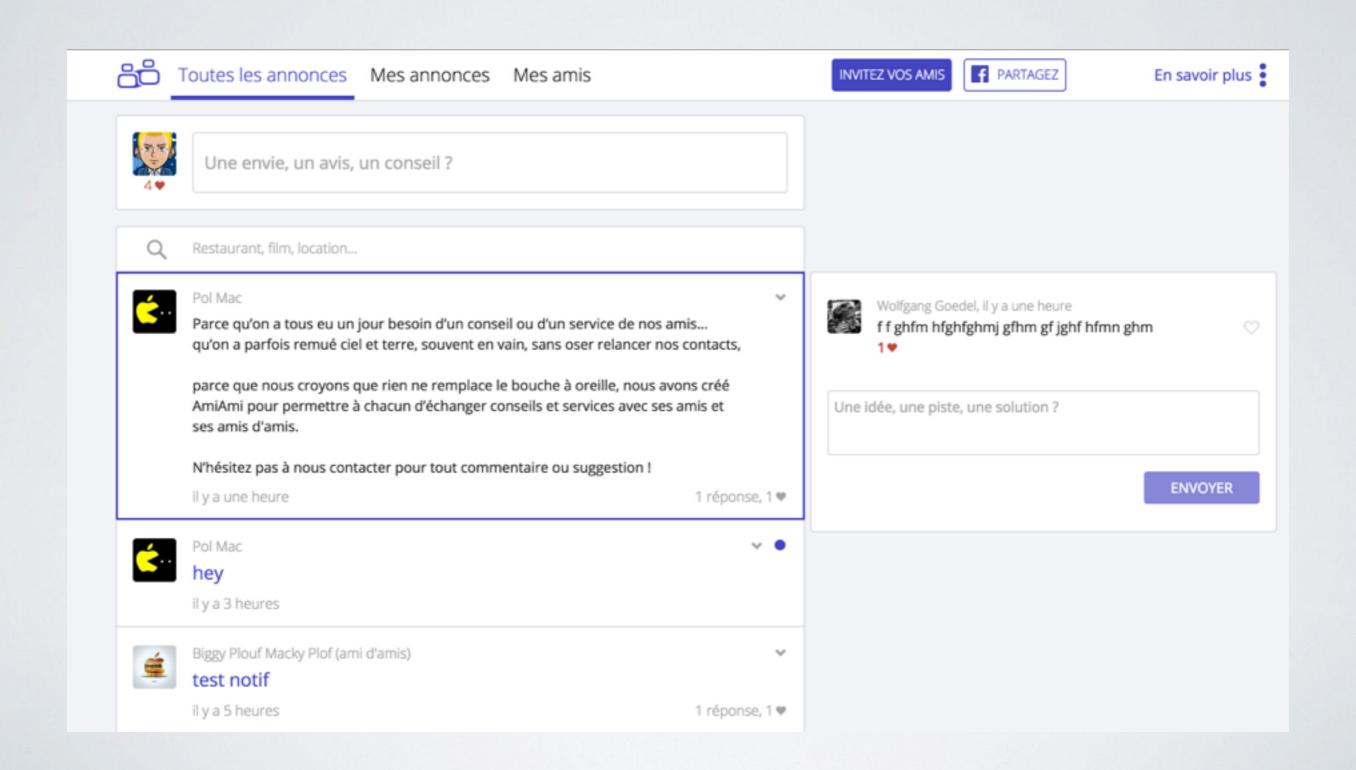

COMMENT

- 1. Optimisations site web mobile (responsive)
- 2. Fork code base web
- 3. Adapt
- 4. Merge fork web
- 5. Package

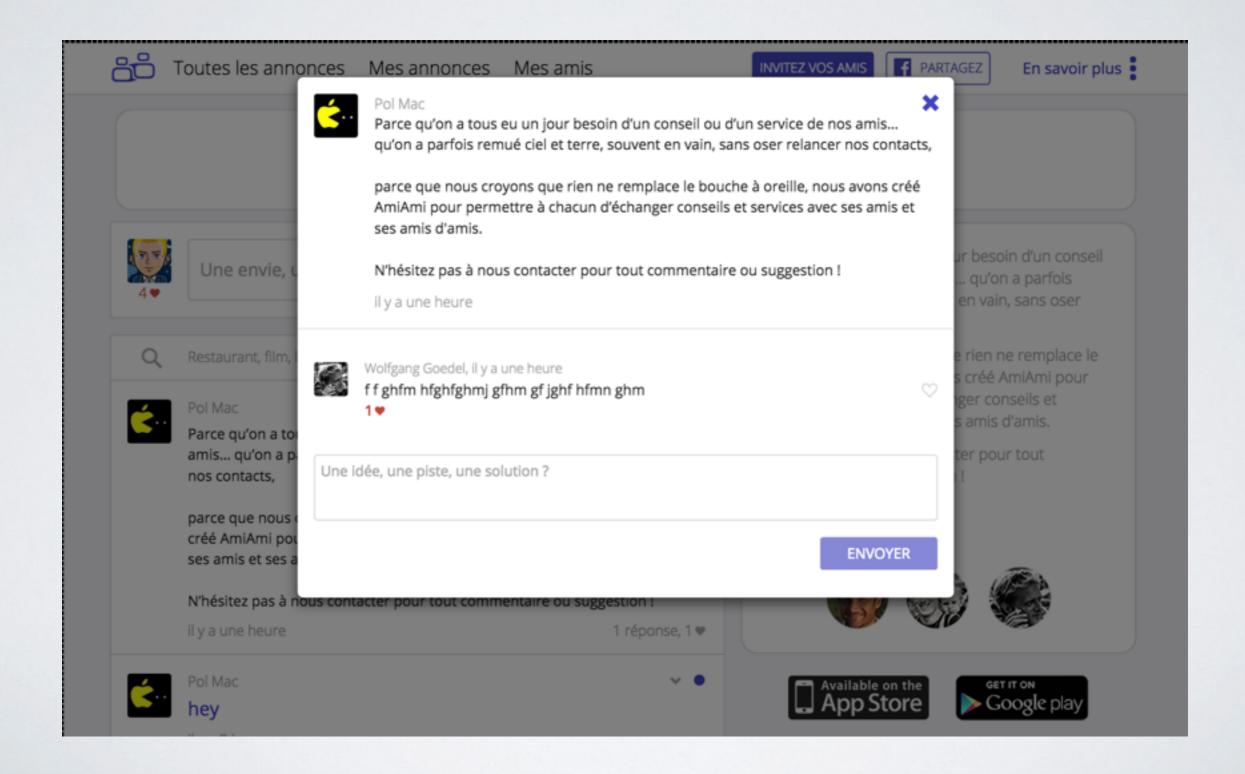

OPTIMS FRONT SITE WEB

- Know your Bootstrap
- Simplification UI/UX (touch-aware)
- Scroll / paging
- Protocol-relative URLs
- Détail annonce
- Modales

DÉTAILS ANNONCE

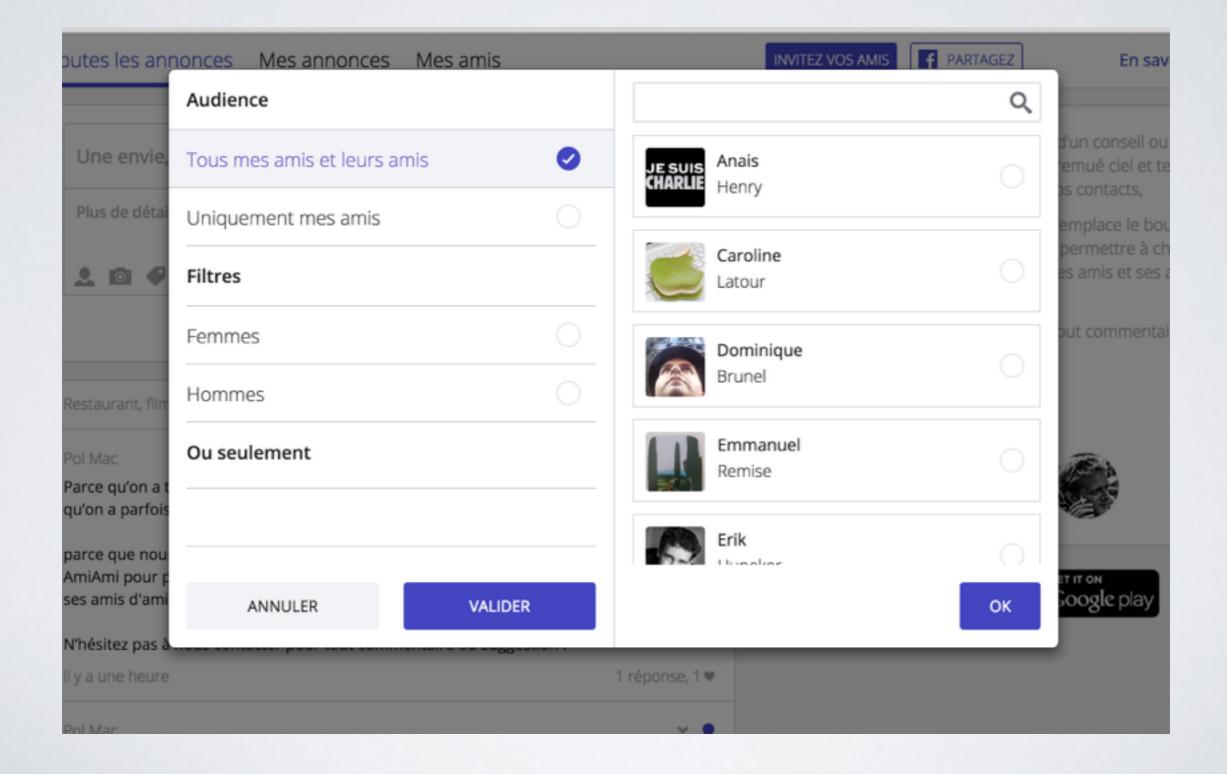

DÉTAILS ANNONCE

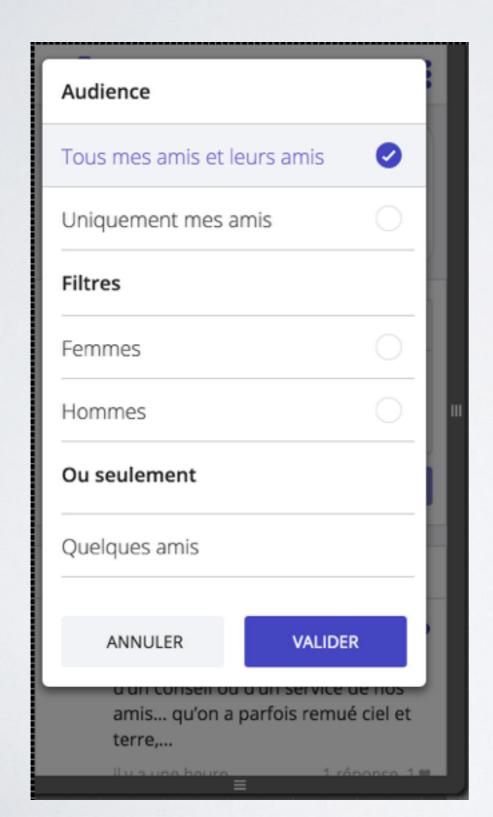

DÉTAILS ANNONCE

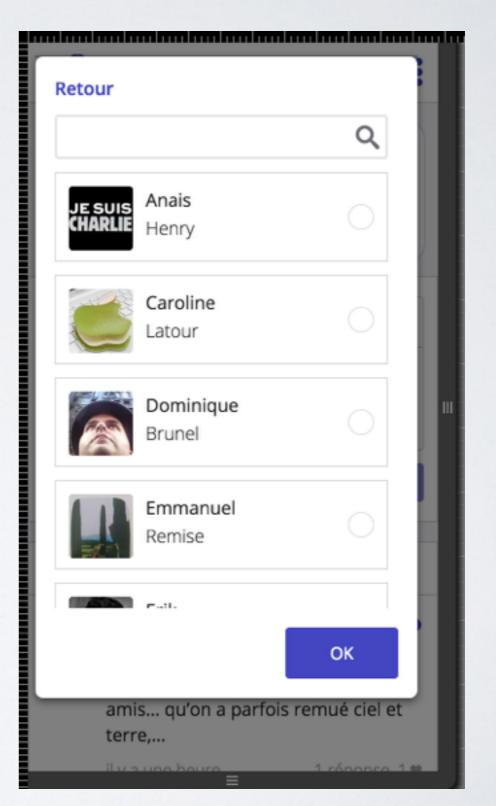

- angular-route-segment (ou ui.router)
- · Permet de faire des vues et des routes imbriquées
 - /announces
 - /announces/<id> (charger cette route sans recharger la vue parente)

MODALES

MODALES

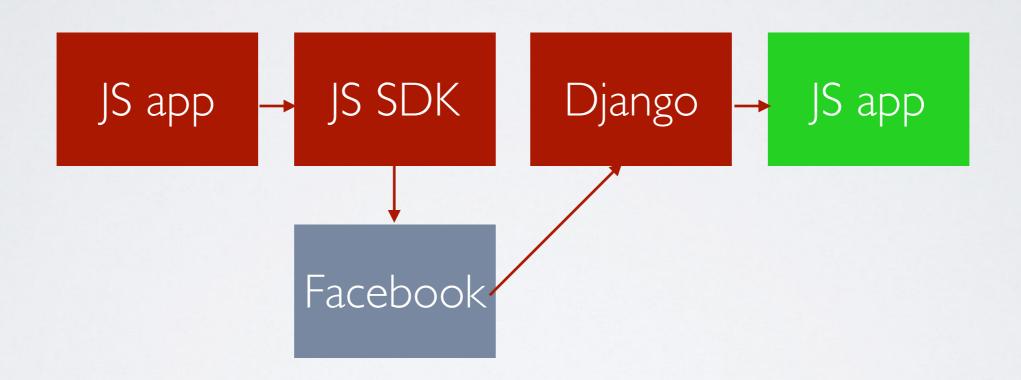

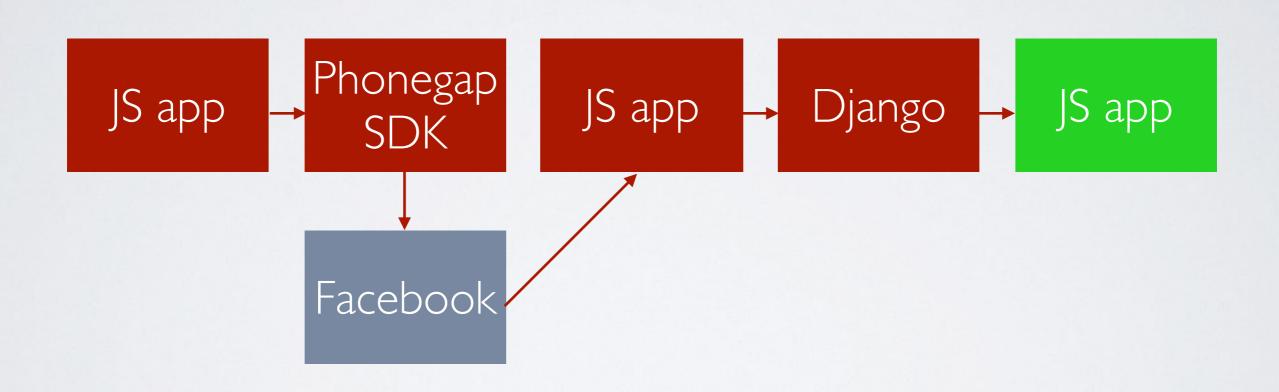

LOGIQUE SPÉCIFIQUE

- Process de login
- SDK Facebook natif
- Push Notifs

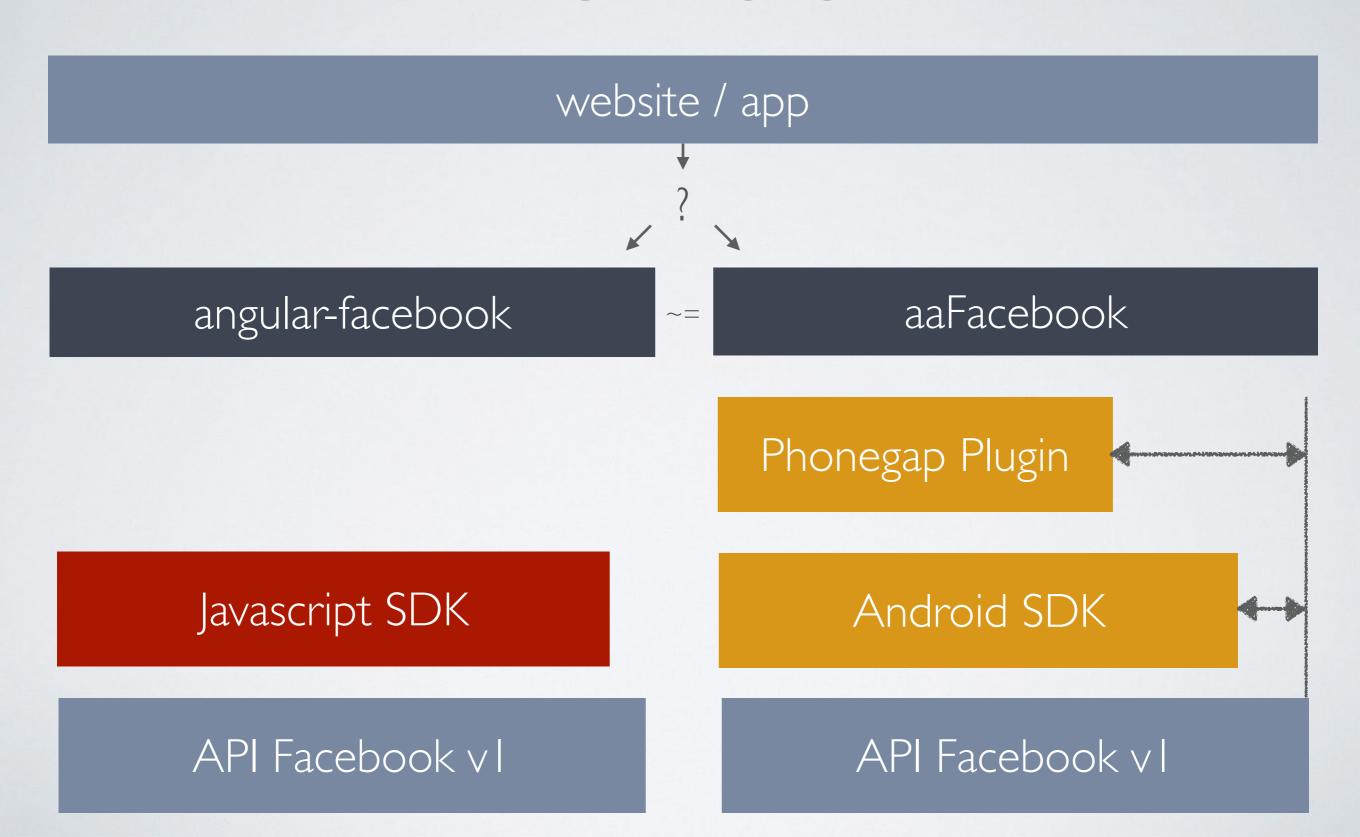

PROCESSUS DE LOGIN WEB

PROCESSUS DE LOGIN CORDOVA

FACEBOOK

CUSTOM ANGULAR BOOTSTRAP

1. Bootstrap tout de suite si web, après deviceReady si Cordova

```
if (window.cordova !== undefined) {
 bindEvents();
} else {
bootstrap('web');
var onDeviceReady = function() {
bootstrap('cordova');
};
var bindEvents = function() {
document.addEventListener('deviceready', onDeviceReady, false);
};
```

CUSTOM ANGULAR BOOTSTRAP

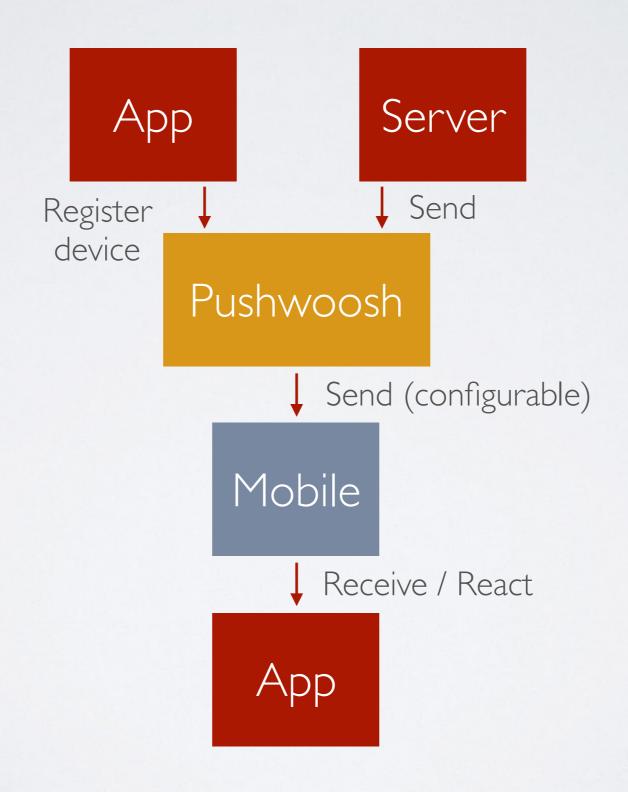

2. Bootstrap avec les modules et la logique qui vont bien

```
var bootstrap = function(bsType) {
 if (bsType === 'web') {
   angular.module('amiamiboostrap', ['facebook', 'amiami-
config', 'amiami', 'angulartics',
'angulartics.google.analytics']) [... config / run ...]
 } else if (bsType === 'cordova') {
   angular.module('amiamiboostrap', ['aa-facebook', 'aa-push-
notifications', 'amiami', 'angulartics',
'angulartics.google.analytics.cordova']) [... config / run ...]
 }
angular.bootstrap(document.body, ['amiamiboostrap']);
```

PUSH NOTIFICATIONS

- Pushwoosh
 - Lib Python maison dispo
 - Plugin Phonegap maison dispo
 - · Lib iOS dispo
 - Pricing décent
- UrbanAirShip
- Parse
- Custom (iOS + Android)

PUSH NOTIFICATIONS

SINGLE CODEBASE?

```
$ grep -rn isCordova app/scripts/ app/views/ | wc -l
```

```
$ grep -rn isCordova app/scripts/ | wc -l
7
```

```
# windowlsLarge | windowlsXSmall
$ grep -rn windowls app/scripts/ app/views/ | wc -l
36
```

THIRD PARTY

\$ cordova plugins list com.adobe.plugins.GAPlugin 2.3.1 "GAPlugin" com.ionic.keyboard 1.0.3 "Keyboard" com.phonegap.plugins.facebookconnect 0.6.0 "Facebook Connect" com.pushwoosh.plugins.pushwoosh 3.3.0 "Pushwoosh" org.apache.cordova.dialogs 0.2.11 "Notification" org.apache.cordova.network-information 0.2.14 "Network Information" org.apache.cordova.splashscreen 0.3.5 "Splashscreen"

OUTILLAGE

- · cordova-cli
- grunt (almost) everywhere
 - grunt-angular-phonegap (surcouche cordova-cli)
 - custom tasks by env (relative to ng app config)
 - Managing Cordova Plugins With package ison and Hooks
- Makefile FTVV (relative to cordova config by env)

CHALLENGES

- Facebook, Facebook, Facebook
 - Décalage features API : impacts fonctionnels et techniques
 - Retours non cohérentes cross-platform
- Performance
- Tests (GenyMotion!)

WHAT'S NEXT

- Local Storage
- Paging intelligent
- Facebook API v2
- Websockets
- Ionic?
- · iOS?
